

RECORDING STUDIOS

World Class Sonics, Other-Worldly Vibe

STUDIO A

PRO TOOLS | HD

A sublime recording environment, from both a sonic and aesthetic perspective. Designed by George Augspurger, the studio features a classic 36 input API recording console, Pro Tools HD2, three ISO booths, 23 foot ceilings and a very sweet natural ambiance. Come experience the marriage of "old-school" warmth with the latest in 24-bit digital technology.

STUDIO B

PRO TOOLS | HD

A perfect production studio featuring Digidesign's Pro Tools HD3 (and companion Control 24 digital control surface), full MIDI integration, a live tracking room, iso booth and a very comfortable design makes this studio a favorite with many artists and producers who require the horsepower of hard-disc based recording.

Once you've achieved a stellar mix down, the final step is the editing and mastering of your project. Studio B utilizes IK Multimedia's T-Racks Mastering Software to put the power of an entire mastering studio at the engineer's fingertips. T-Racks can easily custom tailor your mixes into the "sound" you're looking for. Give us the opportunity to turn your mixes into a master that is ready for CD manufacturing.

STUDIO C

PRO TOOLS LE

Studio C also provides a comfortable space for recording voice-over production via phone patch or over ISDN lines. The room features an acoustical environment suitable for cutting killer lead vocal tracks or even a full drum kit. Studio C is a versatile room designed for advertising producers and record producers alike. Studio C has become home to local/regional hip hop artists and labels that are looking for that "national sound". Our in-house producer KOLD-KUT can create tracks on the spot for all genres of urban music.

COMPACT DISC MANUFACTURING

The Lodge can take the worry out of CD and Cassette replication. We are able to coordinate all aspects of CD pressing from 10 to 10,000 discs (or more). Our industry connections give us the upper hand with both turnaround time and price. Let us prepare a quote and show how we can save both time and money on your media manufacturing needs.

A facility where producers and musicians can work comfortably in a highly creative environment.
